

Ammar Alaa

Front-End / Full-Stack (Next.js) Developer

ammар.omar@a2sv.org — +20 102 313 4890

linkedin.com/in/ammар-alaa-am77 — github.com/am-mar7

SUMMARY

Motivated Front-End/Full-Stack Developer with **proven rapid skill mastery** and strong computer science fundamentals and exceptional problem-solving ability (900+ problems solved on Codeforces & LeetCode). Experienced in building production-ready web applications using modern technologies including **Next.js, React, TypeScript, Tailwind, MongoDB, Supabase, and RESTful APIs**. Completed rigorous project phase at A2SV, **collaborating with cross-functional teams to deliver real-world applications and features**.

EXPERIENCE

front-end developer 03/2026 – Present

3DDX (3D Diagnostix) — Remote

- Partnered with a senior team lead and junior developers to deliver a math-intensive product, designing and implementing sophisticated algorithms while optimizing computational logic for scalability and efficiency.

Software Engineering Trainee 01/2025 – 01/2026

A2SV (Africa to Silicon Valley) — Remote

- Completed **intensive one-year training** in algorithms, data structures, and system design; contributed to **2 projects** under tight deadlines

EDUCATION

B.Sc. in Software Engineering 09/2023 – 05/2027

Al-Azhar University — Cairo, Egypt

KEY ACHIEVEMENTS

- Achieved notable placements in **ECPC**, ranking highly among hundreds of teams.
- Solved **900+ algorithmic problems**, demonstrating strong analytical reasoning.

TECHNICAL SKILLS

- Frontend:** React, Next.js, TypeScript, JavaScript (ES6+), Tailwind CSS, Shadcn UI, Flowbite, Responsive Design.
- Backend:** Next.js Server Actions, RESTful APIs, Node.js (Basics).
- Database & Tools:** MongoDB, Mongoose, Supabase, Git, GitHub, Postman.
- CS Fundamentals:** OOP, **Database Design & Modeling**, Data Structures & Algorithms, Problem Solving.
- Soft Skills:** Teamwork, Analytical Thinking, Ownership, Continuous Learning, Communication.

PROJECTS

Activo Store – Production E-Commerce Platform for Real Client Live Site — Code

Tech Stack: Next.js 15, TypeScript, MongoDB, Mongoose, Tailwind CSS, Shadcn UI

- Delivered a **production e-commerce platform for a real client**, handling end-to-end development from requirements gathering to deployment with complete shopping functionality including product catalog, cart, checkout, and order management.
- Engineered comprehensive **admin dashboard with real-time analytics**, featuring revenue tracking, order management, inventory control, and customer insights with interactive data visualizations.
- Implemented **advanced search with live autocomplete**, fuzzy matching, and multi-filter support; integrated product review system with rating aggregation and moderation workflows.
- Achieved optimized performance through strategic caching, image optimization, and efficient database queries with proper indexing for sub-200ms API response times.

DevOverFlow – Developer Q&A Platform Live Demo — Code

Tech Stack: Next.js 16, TypeScript, MongoDB, Tailwind, Shadcn UI

- Built a production-ready full-stack Q&A platform achieving **95+ Lighthouse performance score** with sub-130ms API response times through strategic Next.js caching and optimized server components.
- Designed scalable MongoDB schemas with complex relational models (10+ entities) supporting **100K+ MAU capacity**; developed REST API routes and Server Actions with connection pooling strategies.
- Integrated **Google Gemini API** for AI-powered answer enhancements and engineered a sophisticated recommendation engine analyzing multi-dimensional user interactions to surface relevant content.
- Implemented advanced search architecture with global/local filtering, tag-based navigation, and optimized pagination using URL search parameters for SEO-friendly deep linking.
